ASX-200/500/800 Series of Autosamplers

More features and improved performance define the next generation of autosampler from Teledyne CETAC Technologies. Built upon the reliability of their predecessors with latest generation electronics, improved accessory interfaces, enhanced pumping capabilities, easier serviceability and a sleek new design, these autosamplers provide all of the features of a CETAC Autosampler in compact, easy to use systems.

APS-1650 Automated Preparation Station

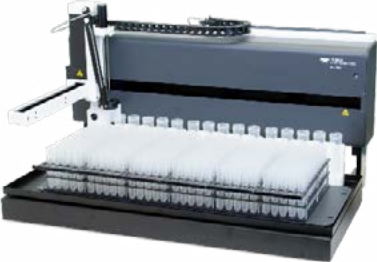

Pre-analysis preparation of oil samples is achieved via a relatively simple dilution process; however these dilutions are time consuming and carry the potential for human error. The APS-1650 Automated Preparation Station addresses the need for an automated process solution for the preparation of diluted oil samples. The system is designed to ensure fast, accurate sample dilutions in a small footprint which saves time and bench space.

Oils 7400 & Oils 7600 Homogenizing Autosamplers

The new Oils 7400 and Oils 7600 Homogenizing Autosamplers are designed to prevent sample settling by mixing each sample prior to analysis. These autosamplers also boast a sliding rinse station fed by dual peristaltic pumps to quickly change between oil and coolant testing on demand.

PARTICLE PLUS Precision Sample Introduction System

The *PARTICLE XPRESS* Precision Sample Introduction System is an add-on for the Oils 7400 Autosampler and the PPS Particle Counter for conducting automated particle counting. The system is available as an online package for combined particle counting and ICP analysis on a single sample or as an offline package for particle counting only.

ASXpress Plus Rapid Sample Introduction Accessory

The *ASXPRESS PLUS* is a simple sample injection accessory that dramatically increases sample throughput to an ICP-OES or ICP-MS. The *ASXPRESS PLUS* features a metal-free, 6-port injection valve and inert, high-speed vacuum pump to rapidly load a sample loop for introduction to the nebulizer. A simple software control system controls *ASXPRESS PLUS* parameters (ex. load time); all system parameters are stored in the *ASXPRESS PLUS* control module.

Ultrasonic Nebulizers – U5000AT⁺/U6000AT⁺

The U5000AT⁺ Ultrasonic Nebulizer offers up to 10x lower detection limits for ICP-OES and ICP-MS versus a conventional pneumatic nebulizer. Samples are introduced onto a highly efficient piezoelectric transducer, providing greater analyte transport efficiency to the ICP. The U6000AT⁺ adds a membrane desolvation module to the U5000AT⁺ Ultrasonic Nebulizer. The U6000AT⁺ offers improved reduction of solvent-based interferences in ICP-OES and ICP-MS. The U6000 AT⁺ is especially useful for the introduction of volatile organic solvents.

A NOTE ABOUT PROBE TYPES <p>Most CETAC autosamplers built since January 2009 are equipped with carbon fiber probes and associated Z-drives. (Septum-piercing autosamplers are an exception.)</p> <p>The carbon fiber reinforced probes are designed to be mounted to a Z-drive with two probe clamps and without a guide plate. The carbon fiber probes can also be used with the prior version Z-drives, but the guide plate must be used.</p> <p>The Ultem® probes (made with Ultem® brand polyetherimide resin) are more flexible than the carbon fiber reinforced probes, and therefore do require the use of a Z-drive-mounted guide plate. The carbon fiber style Z-drives all include a guide plate (not installed) to allow use of Ultem® probes if so desired.</p> <p>All wetted surfaces (liquid contact) of both the carbon fiber and Ultem® probes are inert and identical (PTFE). Color bands indicate inside diameters and are the same for both probe types.</p>			
	Stainless Steel Sample probe with filter tip (Used in Oil analysis) Teledyne CETAC's stainless steel filtered sample probes have been redesigned for better performance and ease of use. The new design features larger filter holes to prevent clogging and a rounded tip. The new probe is a direct replacement to older style probes and is included with all Oils 7400 and Oils 7600 systems, the Oils 280, and the Oils completion kit for the <i>ASXPRESS PLUS</i> .
